An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 96, the dependency has been changed from "80" to – 79 --, as claim 80 has been canceled.

The following is an examiner's statement of reasons for allowance: Claims 53, 54, 57-65, 67-74, and 77-96 define over the art in that none of the art uses 4,4'-bis(dimethylamino)-benzhydrol as a color change indicator in a breath device. The art such as Tratnyek 4407960 establishes that 4,4'-bis(dimethylamino)-benzhydrol is known to be useful as a color change indicator, but none of the art establishes that it changes color in response to any substance found in breath. Therefore, there is no suggestion in that art to modify references such as Berry to use 4,bis(dimethylamino)-benzhydrol, as there is no suggestion that 4,bis(dimethylamino)-benzhydrol would be useful to indicate bad breath.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
